WELCOME TO INDEPENDENT WATER TECH

Dedicated to the Independent Water Dealer

Independent Water Tech (IWT) is dedicated to providing Independent Water Dealers across North America with more value than ever before! Our complete line of new and innovative high-quality products allow you to stand out in your market. Fresh new designs combined with enhanced features to benefit both the end consumer and the dealer installing the equipment.

Unique Features

Unique features like our 'meter in bypass' design with quick connect fittings make our softeners and whole-house filters the easiest you have ever installed! Quick connects on brine line, drain line and even power cord make installs fast and easy.

Simple electronics with no confusing codes or symbols are easy to work with. Our 565 Control valve features our "No Touch" rotating display of helpful basic diagnostic information reducing unnecessary service calls.

Unsurpassed Quality

Our NSF certified fiberglass tanks are by far the strongest and most reliable in the industry. In North America we have had zero tank failures! Globally, there has been one tank return in the past 1,000,000 tanks! There is not another company in the world that can come close .

The tanks high gloss finish makes it the most attractive tank available – so attractive that you don't need a tank jacket although we have those too!

Brine tanks and cabinets are blow molded from high quality NSF approved high density polyethylene. The heavy duty design includes molded handles for easy handling, locking lids to keep secure, exceptional resistance to cracking and injection molded plastic brine grids.

Control valves are NSF tested to NSF44 standards for structural integrity.

Complete Product Line

We offer pretty much anything a Water Dealer might require. Our broad line of Residential and Commercial water treatment equipment includes:

- Water Softeners & Whole-House Filters
- Specialty Combination Systems
- Control Valves
- Fibreglass Tanks & Tank Jackets
- Brine Tanks and Cabinets
- Reverse Osmosis
- Ultraviolet Sterilizers
- Distillers
- Point-Of-Use Coolers
- Media
- Point-Of-Use Filter Cartridges & Housings
- Chemical Feed Pumps
- Pro Cleaning Products
- Test Kits

Expert Support

We have centuries of combined experience supporting Independent Water Dealers across North America. IWT might be new but the people are all the best at what they do and will be familiar to you!

More Value For Your Dollar

We guarantee you will get more value for your dollar. We offer the highest quality products at competitive prices – all backed by expert support both in the field and in-house.

Independent Water Tech is a trade name used to market to Independent Water Dealers in North America. The trade name is used by Canature North America Inc. in Canada and Mexico and by Canature USA Inc. in the United States. Both companies have exclusive distribution rights for Shanghai Canature Environmental Products Co. Ltd. in their respective territories.

The Independent Spirit

As an independent entrepreneur you understand that to succeed in today's competitive environment you have to differentiate yourself in the market. Taking calculated risks, staying one step ahead and providing your customers with the best value proposition separates you from the rest of the pack.

We also embrace the independent spirit. Canature North America Inc. and Canature USA Inc. are owned by committed, long-term industry participants who have your best interests at heart.

I have been extensively involved in the manufacture and distribution of water conditioning products in North America for over 40 years. My team, with more than 400 years of combined industry experience, know how to provide 'best-in-class' service.

IWT products meet or exceed all industry performance standards and have been extensively tested by some of the industries best Engineers. We're so confident with our quality that we are extending a **one year 100% money back guarantee** to any of our water dealers who experience any defect whatsoever.

Our products offer modern new designs with features that make installation and service faster and easier than ever before – saving you valuable time & money! Let IWT make a difference for your business! We look forward to serving Independent Water Dealers in Canada and Mexico!

**Don Fettes, President
Canature North America Inc.**

In my 28 years in the water treatment industry I have never been more excited about a product offering as that of Canature. I have serviced the industry long enough to know a winner when I see one and I have never seen anything like this. Canatures designs are unique, their quality

unmatched and the value unprecedented.

As the rest of the industry fights for market share through added value gimmicks, my intention is to bring the market real value. Dealers throughout the US will greatly benefit from a brand new alternative that is fresh in thinking with no lingering legacy issues. We will not dictate your business but only try to improve it.

My team of experienced field representatives and customer service have over 100 years of combined experience and will bring this experience and fresh new products to your dealership regularly. If you are serious about a meaningful change, want unique products with unmatched value call us today. Were worth a serious look.

ABOUT CANATURE

In 2001, Shanghai Canature Environmental Products Co., Ltd. was founded by Mr. Qu Jianguo, a well-known entrepreneur and philanthropist in China. Canature is now one of the world's largest manufacturers of residential and commercial water treatment systems and components.

Located close to the Shanghai Pudong International Airport, the Canature manufacturing campus covers an area of 2,000,000 sq. ft. with over 700,000 sq. ft. of manufacturing space and employing over 350 people. Canature has its own independent government authorized R&D Center and world-leading laboratory. Canature owns more than 100 patented technologies.

Canature's entire facility has been certified to ISO 9001 and ISO 14001 standards. Canature fiberglass tanks and control valves are NSF certified.

Canature manufactures all control valves, fiberglass tanks, brine tanks, cabinets, brine grids, brine wells, safety floats, riser tubes and parts in-house. Canature utilizes the newest and most sophisticated blow molding, injection molding and filament tank winding equipment available.

WORLD CLASS MANUFACTURING CAPABILITIES

ENGINEERING

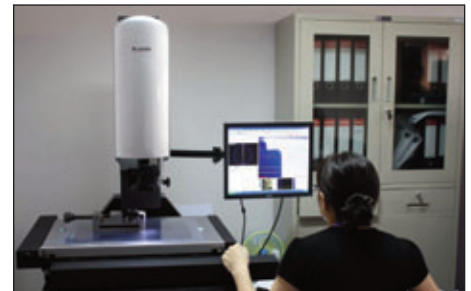

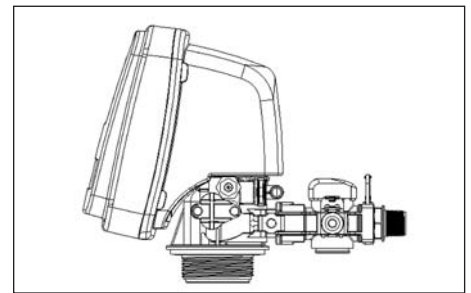

Toby Hughes P.Eng.
EVP Operations

Toby Hughes has gained invaluable experience over the past 15 years as an Engineer in the water treatment industry . His extensive leadership experience in implementing and managing product development, Lean Manufacturing, Continuous Improvement programs, Quality Assurance and MRP (Material Requirement Planning) manufacturing systems has allowed him to help make Canature manufacturing truly world class. As a complete capability manufacturer, Canature NA is an OEM in the truest sense. From raw materials to a complete line of finished water treatment components and assembled units.

RESEARCH & DEVELOPMENT

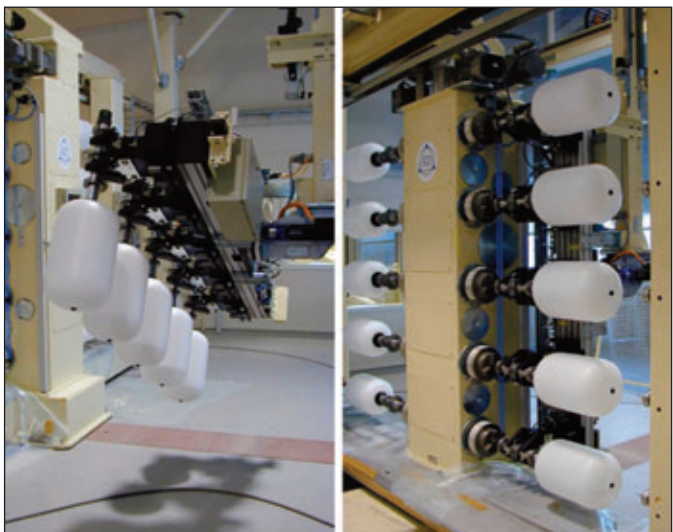

Continued commitment and significant investment into Research and Development ensures Canatures position as an emerging leader in the water treatment industry. Our team of professional engineers work together in the development of new products and existing product quality improvements.

FRP TANK DEPARTMENT

Canature NSF approved filament wound tanks are not only strong and reliable but the finish is unparalleled in the industry. No need for a tank jacket (although we offer those too) with the neatly wound, high gloss finish. Strict tank height control measures mean no surprises when installing a duplex system.

Tanks ordered as a component can come filled with high quality WQA approved resin, saving you money on freight.

PLASTICS DEPARTMENT

Blow and injection molding machines produce all brine tanks, cabinets, tank jackets, salt grids, brine wells, safety floats, airchecks, bypass and installation accessories in-house.

CONTROL VALVE MANUFACTURING ASSEMBLY

Three independent assembly workshops for residential softeners, residential filters and commercial products are strictly managed to conform to ISO9000:2000 standards. Current annual production capabilities are in excess of 180,000.

QUALITY ASSURANCE

Canature employs a strict and formalized quality control program. The 700,000 sq ft Shanghai manufacturing facility is ISO9000:2000 standards certified.

Quality Control Systems

- Document Management
- Receiving Inspection
- In-process Quality Control
- Final Inspection
- Engineering Change Orders
- First Piece & Production Part Approval
- Test Equipment Calibration
- Statistical Process Control
- Vendor Quality Management
- Customer Feedback System

Lab Testing Capabilities

• Burst Testing

High pressure testing of tanks and valves to determine the maximum burst strength.

• Cycle Pressure Testing

High pressure cycle testing to simulate the fatigue strength of the tanks and valves over their life.

• Flow Bench

Precisely measure flow rates and pressure drop.

• Reliability Testing

Continuously cycling the valve through regeneration while taking flow measurements and counting the number of cycles.

• Computer Aided Optical Comparator

Used for precise measurement of very small details such as fillets or radius's.

• Coordinate Measuring Machine (CMM)

Used for precise geometrical x,y, and z measurement coordinates.

• 3D Prototype Printer

Makes 3D models for rapid prototyping.

• Chemical Analysis Laboratory

Complete chemical analysis of raw materials including metals, plastics and media to ensure quality and integrity
